

# Wireframe of Dashboard

Here is the Wireframe of our Final Dashboard which we were planning to do as the part of this Internship.

By keeping all the requirements in mind, we tried to make this dashboard, it includes the some Plots/Graphs.

Each plot presents unique and different insights from the given data.

So these are the Various Components we tried to include in the Dashboard:

- **Total Signups** : It tells us how many people have signed up on the platform.
- **Total Opportunity Signups** : It tells us how many have signed up for opportunities.
- **Top 10 Countries** : It tells us about the Top 10 Countries where the learners have signed up from.
- **USA Geography** : It shows us the Cities in the US, from where the Learners have signed up from also, it shows the total signups from each city.
- **Opportunity Sign Up Distribution** : shows us the Most Popular Opportunities that the users have signed up for.

- **Most Completed Opportunity** : It shows us the most popular opportunities that have been completed successfully.
- **Preferred Sponsors** : It tells us about the most preferred Sponsors on this Platform.
- **Top Skills Earned** : It shows us the list of skills which were acquired by the students most through this opportunities.
- **Student Completion Demography** : It shows the Distribution of opportunity completion through demographics like Gender, Location Etc...
- **Total Scholarship** : It tells us about the total scholarship till now which was given to candidates who have completed the opportunity.
- **Total Male** : Represents the Total number of Males who have signed up so far.
- **Total Female** : Represents the Total Number of females who have signed up so far.
